

# WEB ACCESSIBILITY CHECKLIST

1 All images should have alternative text.  
Good: ``  
Better: ``

2 All videos should be captioned.

3 All navigation prompts should be descriptive.  
Instead of "Click here," label "Click here to download the syllabus."

4 Ensure high level of color contrast on the webpage by using a color contrast checker.

5 Allow scaling up to 200% of all text elements on the webpage.

6 Ensure that all documentation is in OCR (Optical Character Recognition).  
If you cannot highlight the text on a document that means it is likely not in OCR format.

7 Ensure that there is no flickering elements on the webpage.

8 Use tags and styles to format the webpage.

9 Provide a transcript file for all video and audio files.

10 Use tables only for displaying data, not for page formatting.
